

SHASHIDHAR SANGEPU

7382205657 | sangepushashidhar@gmail.com | www.linkedin.com/in/shashidharsangepu

Full Stack Developer with 2+ years of experience building scalable, production-ready web applications using **Next.js, React.js, Node.js, Express.js, PostgreSQL, Sequelize & Typescript**. Experienced in architecting secure REST APIs, implementing authentication & authorization using **AWS Cognito**, integrating complex payment workflows with **Stripe**, and building real-time applications using **Socket.IO & Amazon Chime SDK**. Hands-on experience deploying & managing cloud infrastructure on **AWS**, including **EC2, RDS, VPC, ALB, PM2 and IAM** with a strong knowledge of scalable application architecture, state management using **Redux** and modern frontend development practices. Passionate about building reliable, high-performance software while continuously learning emerging technologies such as **React Native** and **cloud-native development**.

PROFESSIONAL EXPERIENCE

SCALEX TECHNOLOGIES

03/2025 - present

Project: Elite – Mental Health Services Platform:

- Developed and maintained a full-stack mental healthcare platform using **Next.js, React.js, Node.js, Express.js, PostgreSQL, Sequelize** and **Typescript**, supporting **Admin, Expert & User** portals
- Built secure and scalable backend APIs with **AWS Cognito, Google OAuth**, role-based authentication, rate limiting, **Swagger** API documentation, and **Resend** for transactional email workflows.
- Implemented end-to-end payment infrastructure using **Stripe Payment Intents, Stripe Connect & Stripe Billing** for appointment payments, expert payouts and subscription management.
- Engineered real-time features including live notifications, chat and audio/video consultations using **Socket.IO** and **Amazon Chime SDK** enhancing user engagement and communication
- Designed and deployed cloud infrastructure on **AWS**, provisioning **VPC, EC2, RDS(PostgreSQL), ALB** and managing production deployments using **PM2** for both frontend and backend services.
- Architected frontend state management using **Redux** and **Redux Persist**, implementing multi-role authentication, session persistence, multi-step appointment booking, and secure payment workflows.
- Developed responsive, reusable UI components using **Formik, Yup, TanStack React Table, Framer Motion, Recharts**, and integrated multiple REST APIs to deliver a scalable and maintainable user experience.
- Collaborated across the full software development lifecycle, from feature implementation and cloud deployment to production support, performance optimization, and delivery of scalable enterprise solutions.

CAGEN TECHNOLOGIES

07/2024 - 02/2026

Projects: Inspection Management System & Municipal Citizen Services

- **Tech Stack:** **React.js, Next.js, Node.js, Express.js, TypeScript, MongoDB, Ant Design, Redux, TanStack Query, Zod, Redis, Puppeteer, Google Maps API.**
- Developed scalable full-stack applications using **React.js, Next.js, Node.js, Express.js, TypeScript**, and **MongoDB**, delivering enterprise solutions for inspection management and municipal citizen services.
- Built 50+ RESTful APIs for registration, inspection, approval, and certificate workflows, implementing **JWT authentication, RBAC, Zod validation**, and **Redis caching** to improve security and application performance.
- Designed dynamic, configuration-driven forms and reusable UI components that rendered fields entirely from API responses, significantly reducing development effort for new modules.
- Implemented complex frontend features including protected routing, **Redux/Context API** state management, **TanStack Query** for efficient server-state handling, and reusable data tables with dynamic **CRUD** operations.
- Integrated **Google Maps API** for real-time location visualization and polygon-based area assignments to optimize inspector management and field operations.
- Automated certificate generation using **Puppeteer**, dynamically generating **PDF** documents with user-specific data, reducing manual processing, and improving operational efficiency.
- Optimized application performance through **Redis caching**, efficient API design, and reusable component architecture, improving response times and overall user experience.

HULKHIRE TECHNOLOGIES

02/2024 - 06/2024

Project: Payment Integrations App:

- **Tech Stack:** React.js, JavaScript, HTML5, CSS3, Bootstrap, Git, REST APIs.
- Assisted in developing responsive and modular frontend components using React.js.
- Worked on API integration using Axios/Fetch, improving UI-backend data synchronization.

EDUCATION

VIGNANA BHARATHI ENGINEERING COLLEGE

2019 - 2023

Course: Computer Science Engineering, 7.0

TECHNICAL SKILLS

Languages: Javascript, CSS, HTML

Frameworks/Libraries: React.js, Next.js, Node.js, PostgreSQL, Redux, React Query.

Developer Tools: Git, Github, VS Code, Jira.
